Sunny Superhard Tools Co.,Ltd is a professional diamond tools manufacturer since 1993. We started developing our bush hammer tools in 2010, after years of research and development, bush hammer tools have become one of our feature products.

Sunny provides various kinds of bush hammer tools for surface fabricating and making bush hammered effects for stone products. Bush hammer tools can create slip-resistant finishing on granite and marble, breaking down coatings where standard diamonds can't reach, prepares surface for application of thin-set overlay. The repeated hit of carbide tips into stone or concrete surface create a rough, pockmarked texture that looks like naturally weathered rock.

We adopted the sophisticated welding technology and selecting high quality alloy rollers and tool parts, and we have a experienced bush hammer R&D team. So our bush hammer tools is scroll-able and highly efficient. All kinds of bush hammer tools and sizes can be customized.
